Need to Audit Your ServiceNow License Usage?

- Detailed license usage report for ServiceNow by role, group, license type and name, powered by analytics

- Ability to see the exact moment in time licenses were applied or removed, across years of data

- Up and running in 1 day. Licensing data jobs continue to run as long as maintenance is current

- Negotiation Strategy Assistance Included

- One license of Microsoft SQL Server Standard required

- Leverages data from ServiceNow Tables Only

- About 1,000 records per user per year in storage

- Works natively with PowerBI, Tableau and Excel

- Reconcile your annual subscription bill with ServiceNow quickly, easily and accurately

- Accommodates future changes to ServiceNow licensing model with on-going maintenance

- Simple to remove. Stop paying bill, data jobs stop

- Query 10,000,000 rows of licensing data in seconds.

- Based on leading BI Technology from Microsoft

Easily Reconcile Your Annual Bill
